General Preface

Not a day passes in our country when somebody somewhere has not criticized our system of education, particularly our school education. A great many ills and inadequacies of the system probably flow from extraneous causes and need socio-political initiatives that go beyond mere reforms in the school curriculum. Some problems however arise directly from the curriculum - text books, teaching and evaluation practices. We need to keep these problems in view and to continually devise new curricula to overcome them.

Curricular reform efforts and innovations are not new to our country. Nearly every decade, there have been initiatives by the Central and State government agencies to effect changes in curricula. Several independent school networks and voluntary groups have brought out their own textbooks and related material. There is no doubt that significant progress has been made by the country in better conceptualization of the school curriculum at primary, middle and secondary levels. The paradigms of school curriculum in India have steadily evolved and become more relevant and modern. Unfortunately, the over-all deterioration of the system due to extraneous factors has tended to obscure these gains. Also, and most important for our purpose here, there is a large gap between the generally agreed objectives of the curriculum and their actual translation into textbooks and teaching practices.

Homi Bhabha Curriculum is basically an attempt to close this gap as much as possible. It is not conceived to be a revolutionary curriculum. The broad aims of the curriculum are much the same as those articulated in countless reports and articles of different education departments and agencies. The idea is not to produce a fanciful, 'museum-piece' curriculum that nobody would adopt, but to attempt to discover a sound and wholesome curriculum that is practical to implement in our school system. 'Practical' is, however, not to be regarded as a euphemism for the status quo. As the users will find out, the alternative textbooks of the Homi Bhabha Curriculum are full of radical unconventional ideas that we believe are both urgent, necessary and, given enough efforts, feasible. But rather than describe here what we believe to be these innovative aspects, we leave the users, students and teachers, to find and experience them. In the simplest and most favourable situations, devising a curriculum and translating it into books, laboratories and teacher manuals is a daunting task. In the complex parameters and constraints that govern our country's educational system, the task is formidable. Only time will tell if and to what extent the Homi Bhabha Curriculum is an effort in the right direction.

Arvind Kumar

Note to the teachers and parents

As you go through the pages of Maths for Every Child, you will notice some differences from other textbooks. We have tried to make the book attractive in appearance and interesting to children. However, the most important differences are not in the appearance.

Our aim is to move away from an emphasis on merely learning procedures to an emphasis on understanding. In addition to the learning of facts and procedures, we have laid stress on the connections between concepts and procedures and on mental arithmetic skills. In many places, we have provided the child with enough concrete and semi concrete experience that will form a strong foundation for further mathematical learning. While doing all this we have retained the positive elements of the traditional approach : systematic organization of topics, careful sequencing and plenty of practice.

Our attempt has also been to make the text-cum-workbook to be teacher friendly and easy to implement in the classroom. we would appreciate your feedback about how you used the book and your suggestions.

Arun T. Mavalankar

Acknowledgement

Prof. Arvind Kumar, Centre Director, HBCSE initiated the Homi Bhabha curriculum project and gave us constant encouragement. Dr. K. Subramaniam shared his insights and helped to make significant improvements in the content and presentation.

Anagha Deshpande who, did the format and design of the book and contributed ideas for stories. Nilesh Nimkar of Gram Mangal, Dahanu, gave valuable feedback and suggestions. Sandhya Khandare, Head Mistress and teachers of the Nutan Vidya Mandir, Mankhurd gave permission to try the curriculum material in their classrooms. Smita Patil and Shweta Naik helped in producing the drafts.

It is pleasure to express our sincere thanks to all of them.

Arun T. Mavalankar

Let us sing along!

One little kitten
Went to the Zoo
Along came another
That made **Two**
Two little kittens
Climbed up a tree
Along came another
That made **Three**
Three little kittens
Looking for some more
Along came another
That made **Four**
Four little kittens
Calling for their mother
Now they are **Five**
And all are together.

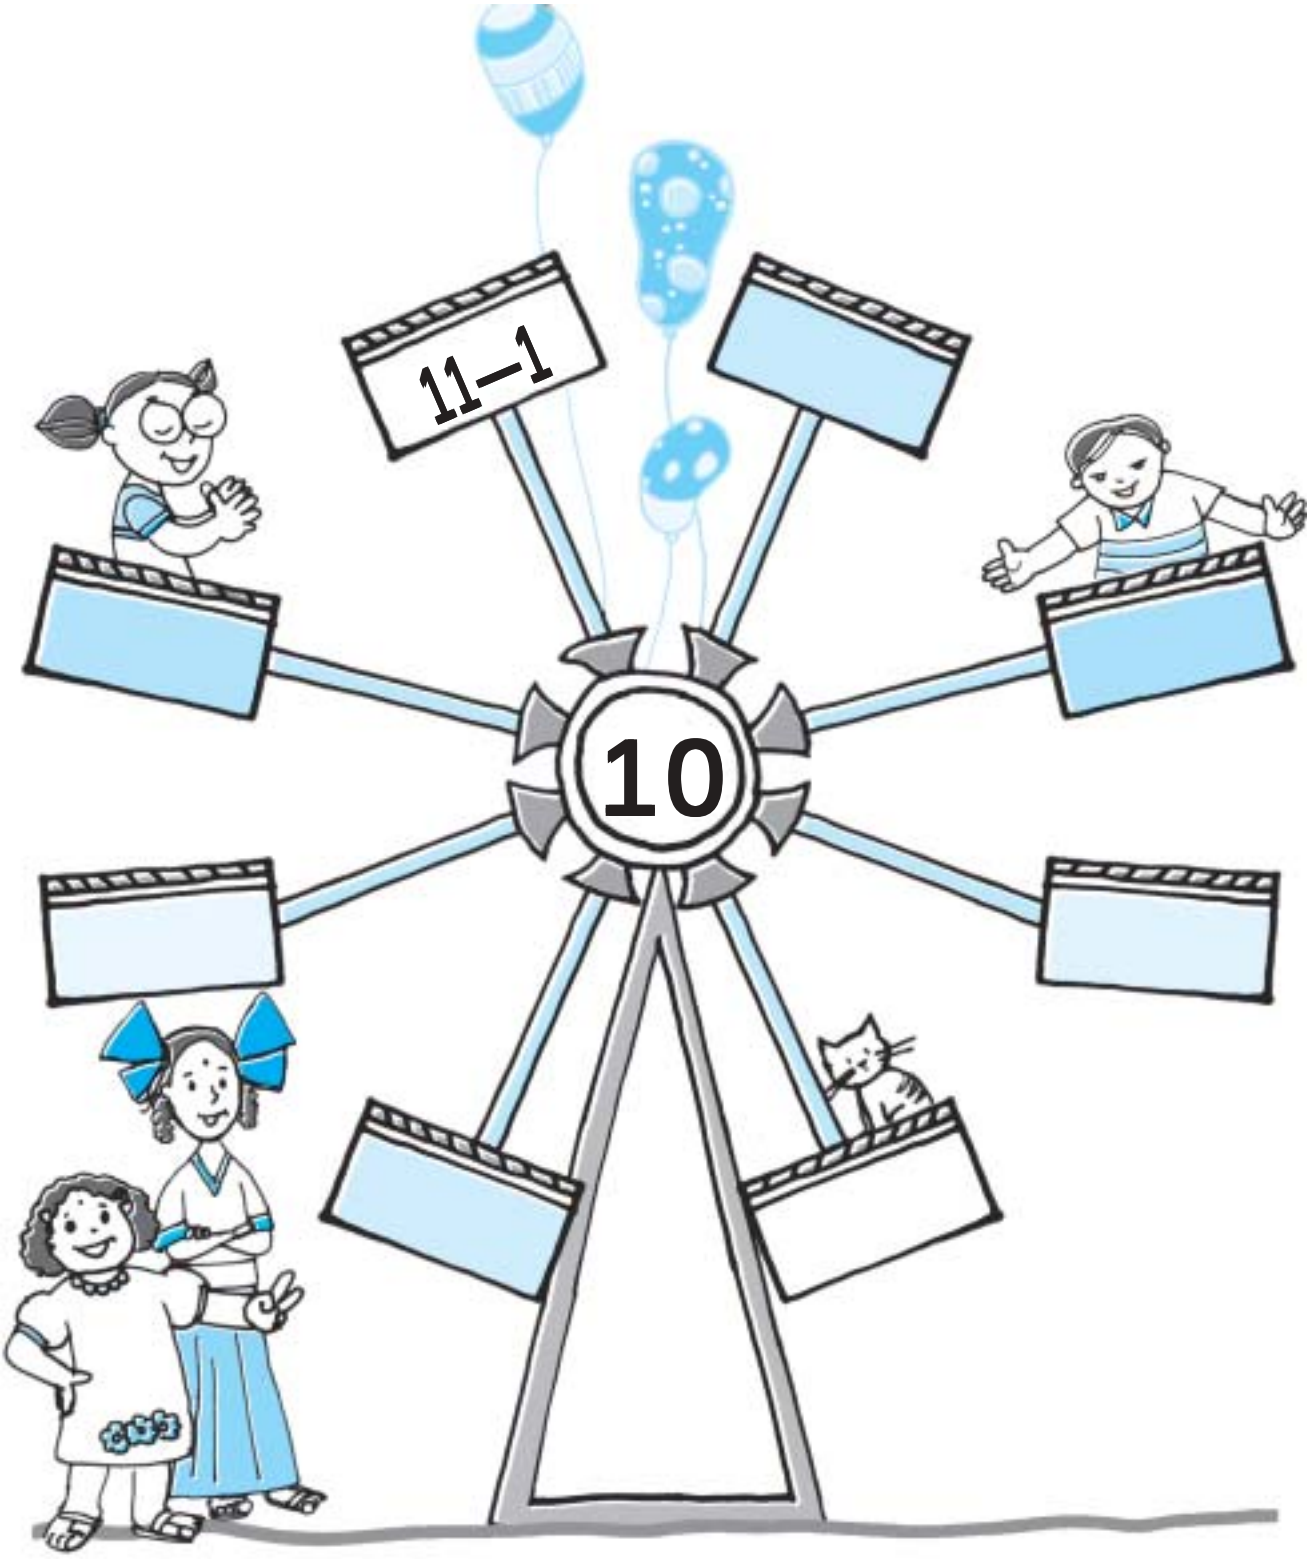
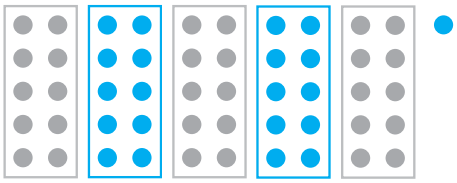
Write a different subtraction each time to make ten.



Unit 13

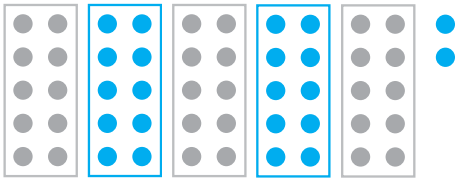
From 51 to 55



Five tens and one

51

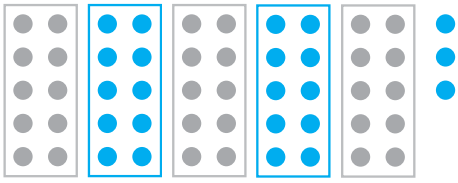
Fifty one



Five tens and two

52

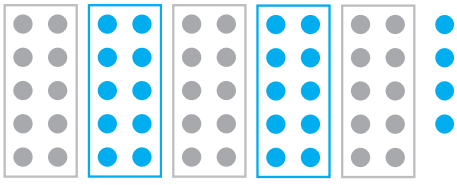
Fifty two



Five tens and three

53

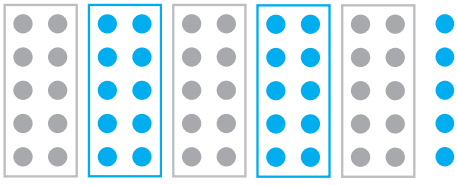
Fifty three



Five tens and four

54

Fifty four

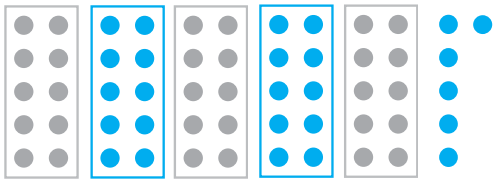


Five tens and five

55

Fifty five

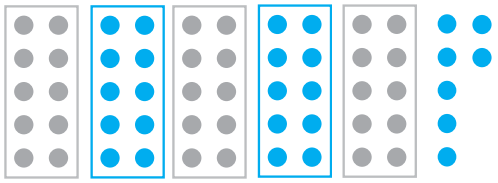
From 56 to 60



Five tens and six

56

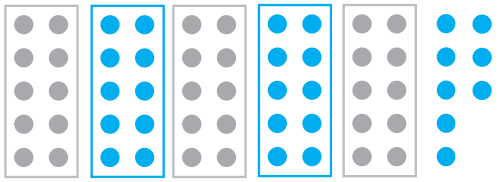
Fifty six



Five tens and seven

57

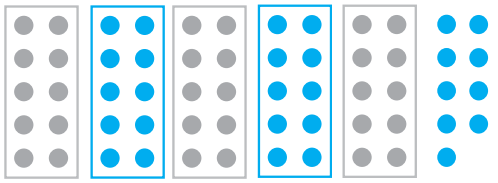
Fifty seven



Five tens and eight

58

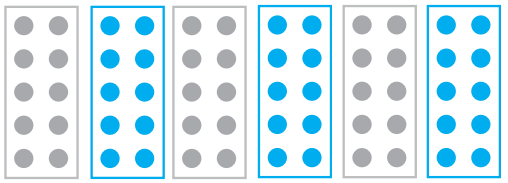
Fifty eight



Five tens and nine

59

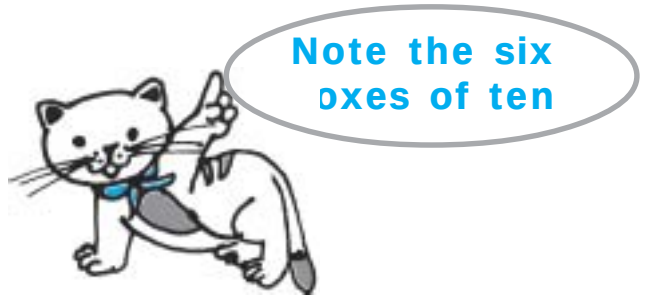
Fifty nine



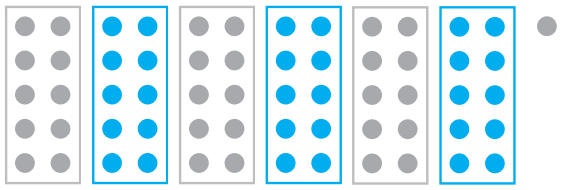
Six tens

60

Sixty



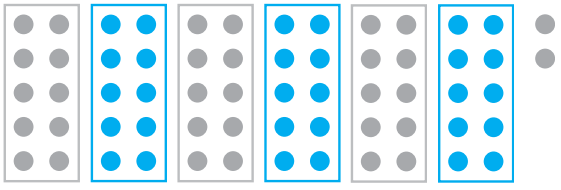
From 61 to 65



61

Sixty one

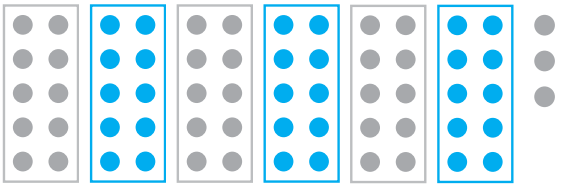
Six tens andone



62

Sixty two

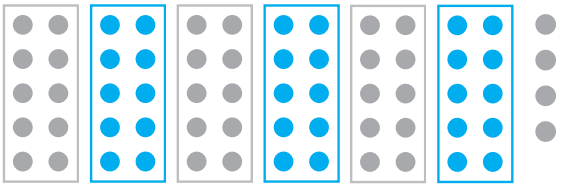
Six tens and two



63

Sixty three

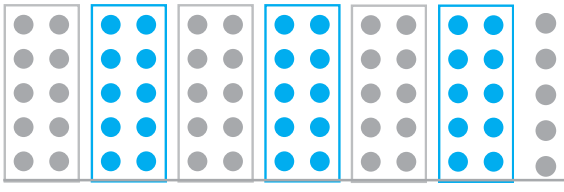
Six tens and three



64

Sixty four

Six tens and four

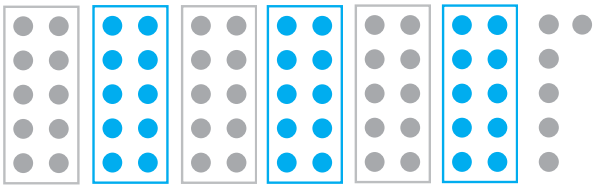


65

Sixty five

Six tens and five

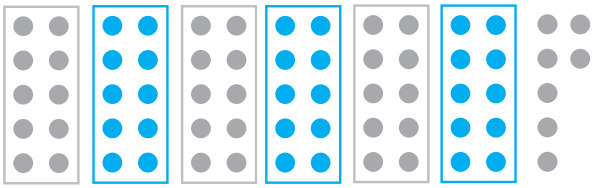
From 66 to 70



66

Sixty six

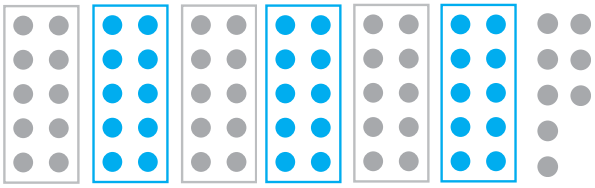
Six tens and six



67

Sixty seven

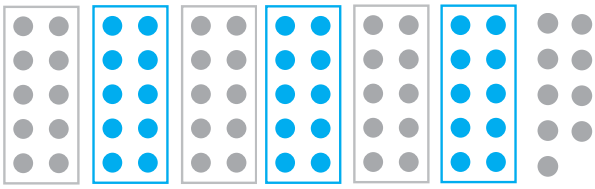
Six tens and seven



68

Sixty eight

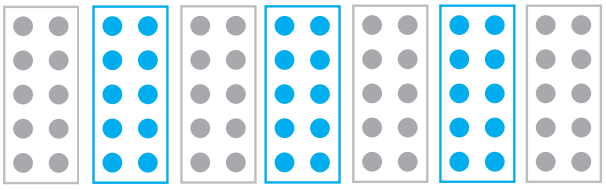
Six tens and eight



69

Sixty nine

Six tens and nine

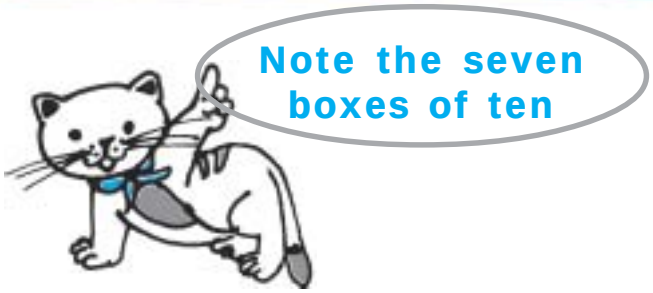


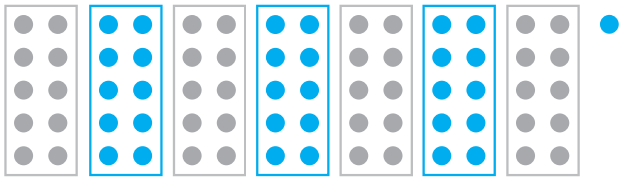
70

Seventy

Seven tens

From 71 to 75

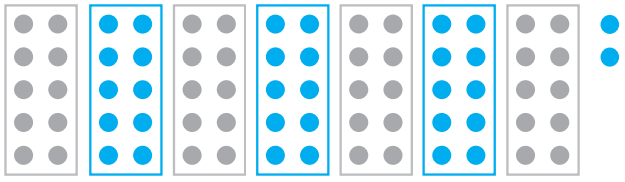




71

Seventy one

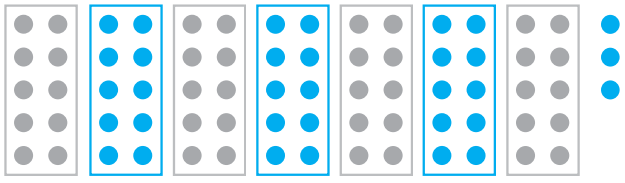
Seven tens and one



72

Seventy two

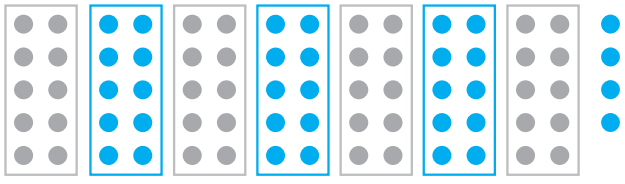
Seven tens and two



73

Seventy three

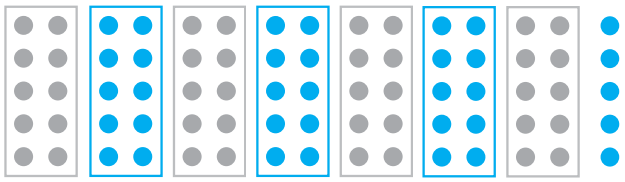
Seven tens and three



74

Seventy four

Seven tens and four

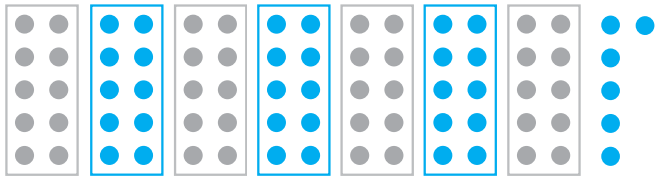


75

Seventy five

Seven tens and five

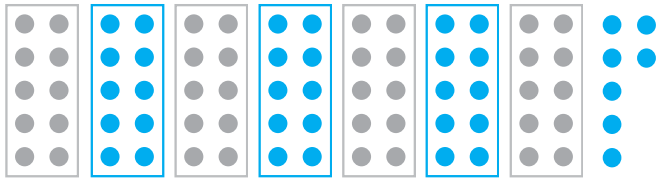
From 76 to 80



76

Seventy six

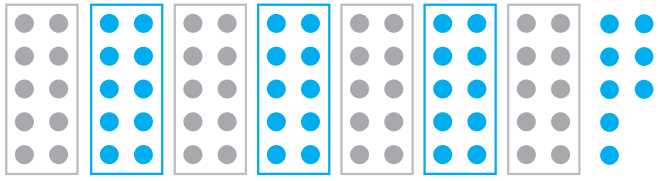
Seven tens and six



77

Seventy seven

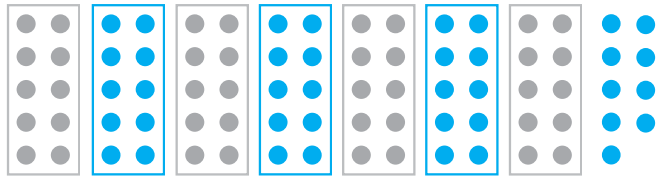
Seven tens and seven



78

Seventy eight

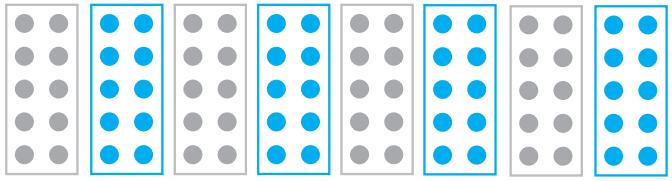
Seven tens and eight



79

Seventy nine

Seven tens and nine



80

Eighty

Eight tens

Writing 51 to 80

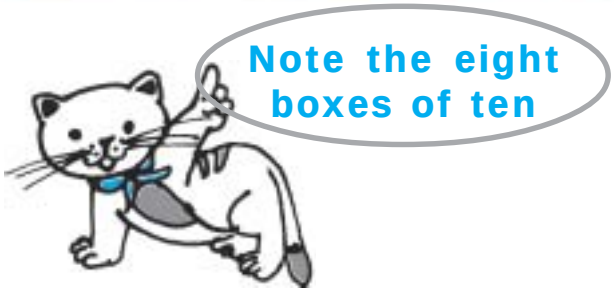
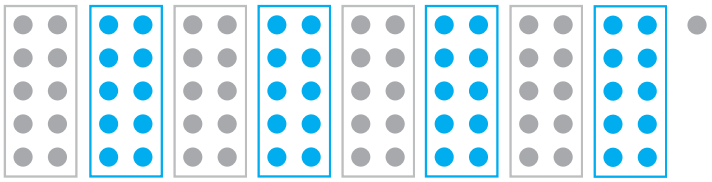
18

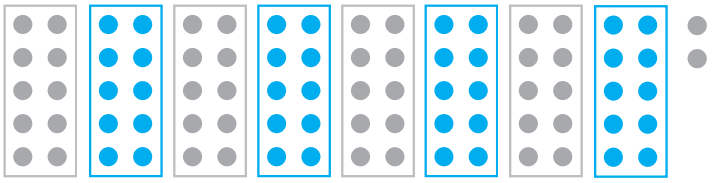
From 81 to 85





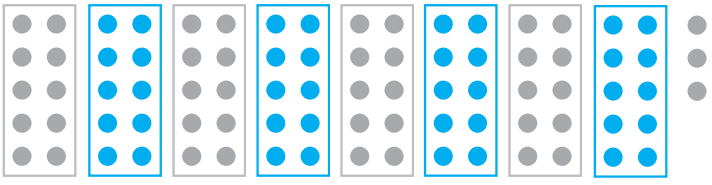
81
Eighty one

Eight tens and one



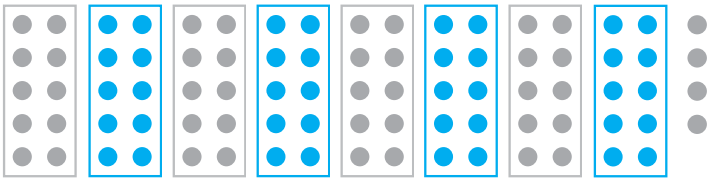
82
Eighty two

Eight tens and two



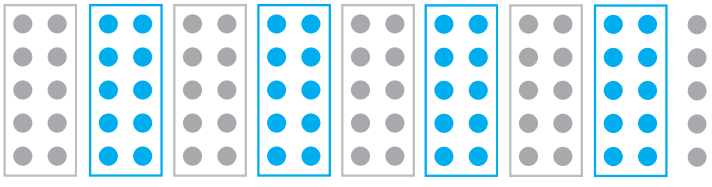
83
Eighty three

Eight tens and three



84
Eighty four

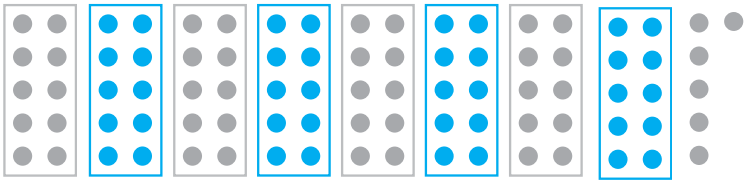
Eight tens and four



85
Eighty five

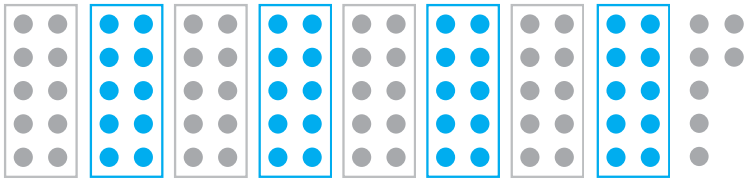
Eight tens and five

From 85 to 90



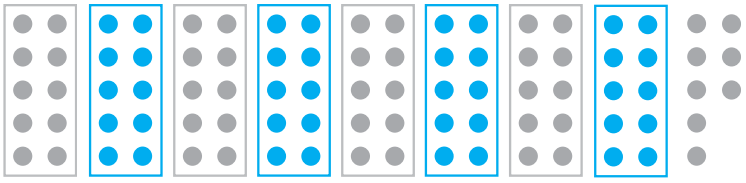
86
Eighty six

Eight tens and six



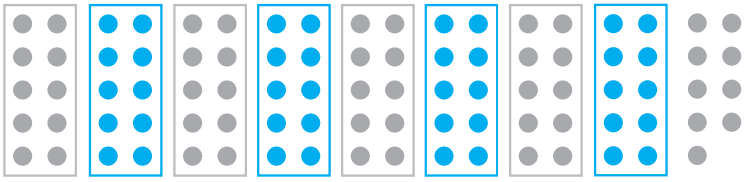
87
Eighty seven

Eight tens and seven



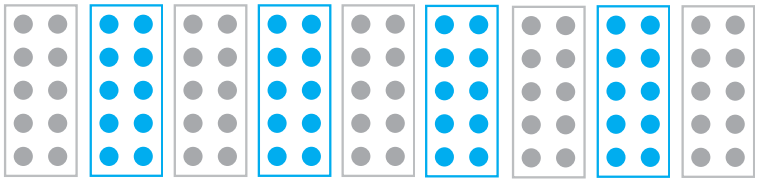
88
Eighty eight

Eight tens and eight



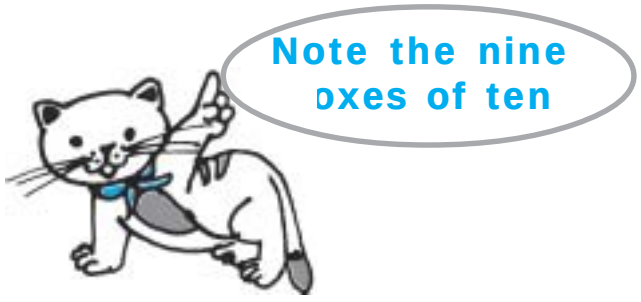
89
Eighty nine

Eight tens and nine

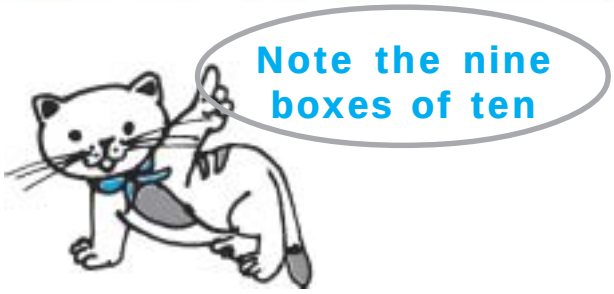


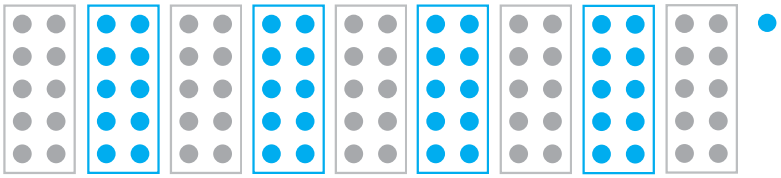
90
Ninety

Nine tens



From 91 to 95

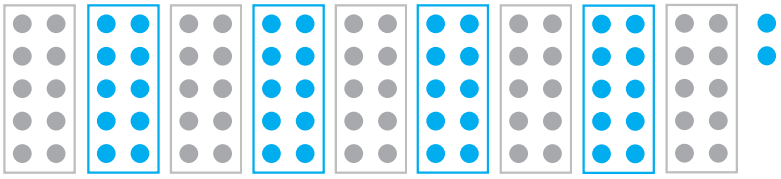




91

Ninety one

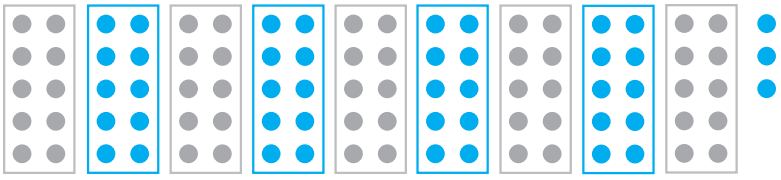
Nine tens and one



92

Ninety two

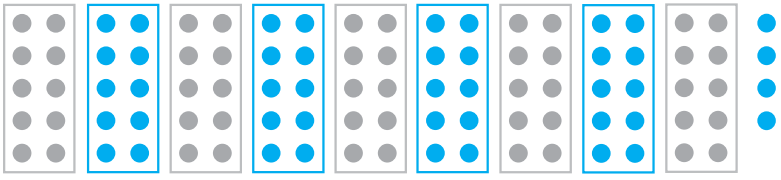
Nine tens and two



93

Ninety three

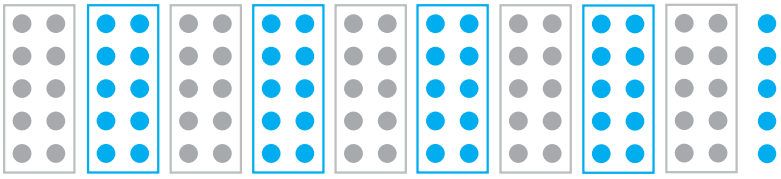
Nine tens and three



94

Ninety four

Nine tens and four

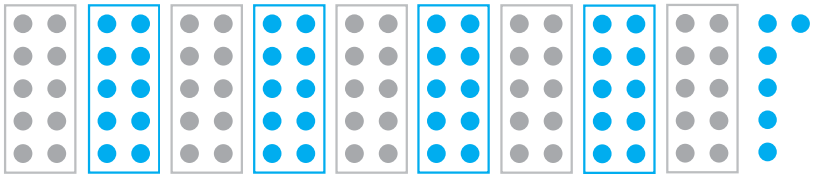


95

Ninety five

Nine tens and five

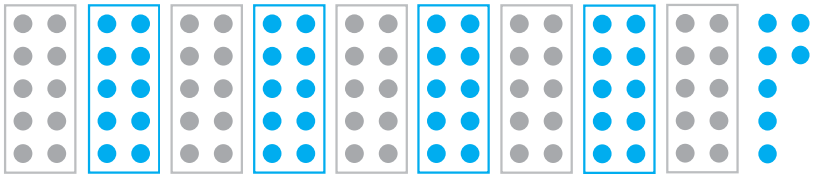
From 96 to 100



96

Ninety six

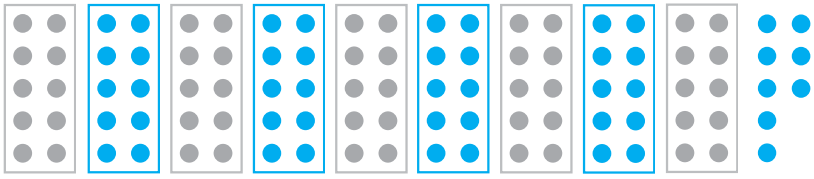
Nine tens and six



97

Ninety seven

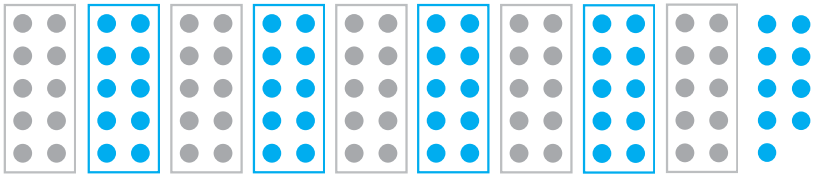
Nine tens and seven



98

Ninety eight

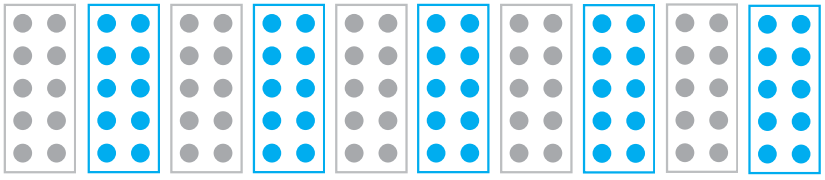
Nine tens and eight



99

Ninety nine

Nine tens and nine



100

Hundred

Ten tens

Note the ten
oxes of ten

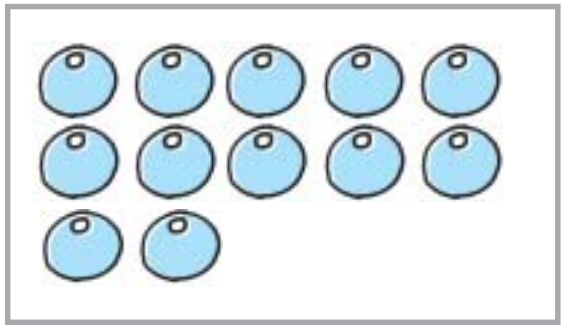
Write 1 to 100

1	2	3	4	5	6	7	8	9	10
11									20
21									30
31									40
41									50
51									60
61									70
71									80
81									90
91									100

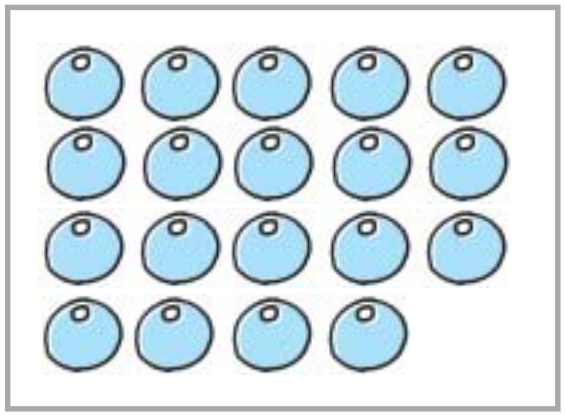
Unit 14 Revision

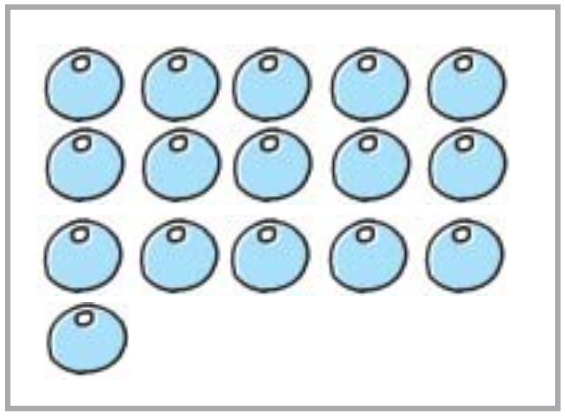
Counting 1 to 20

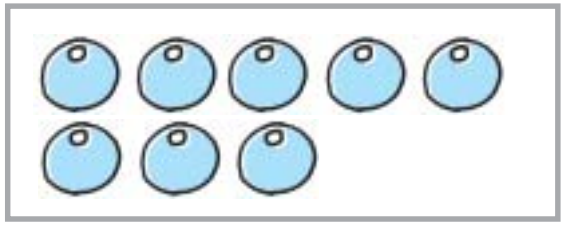
Exercise



12

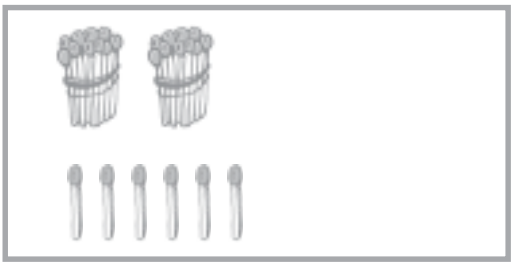




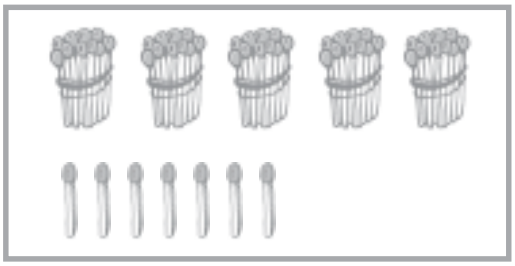


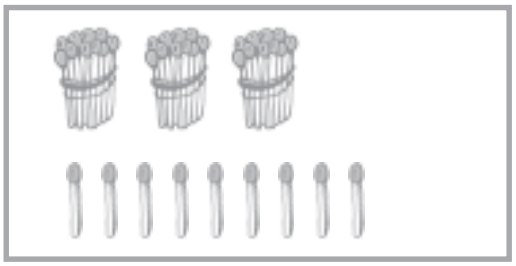
Count and write

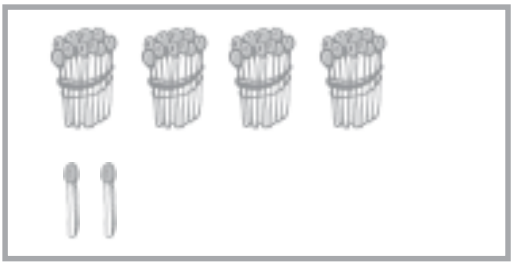
Count tens first.

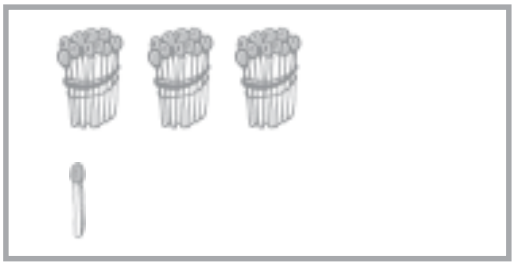


26



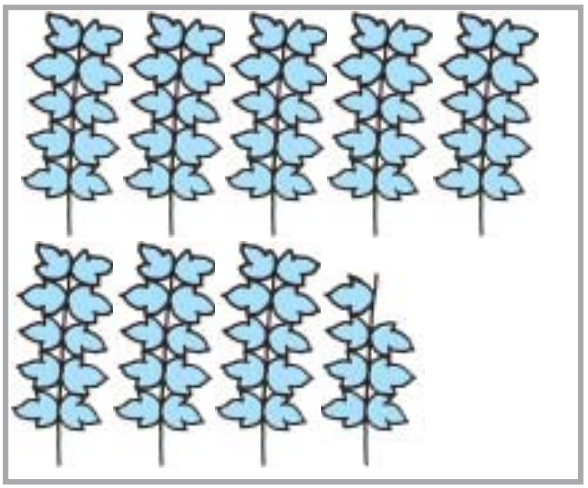




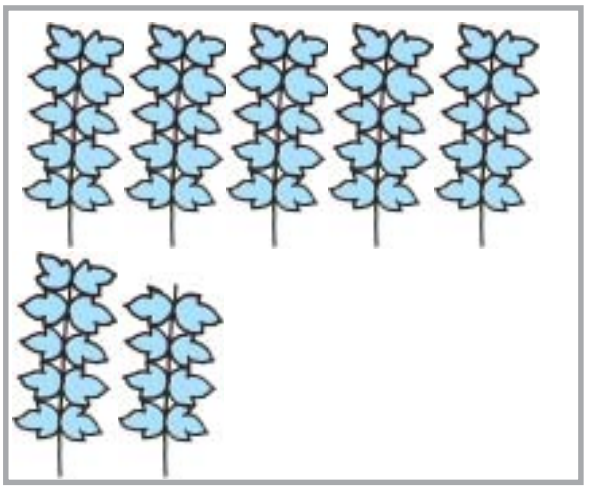


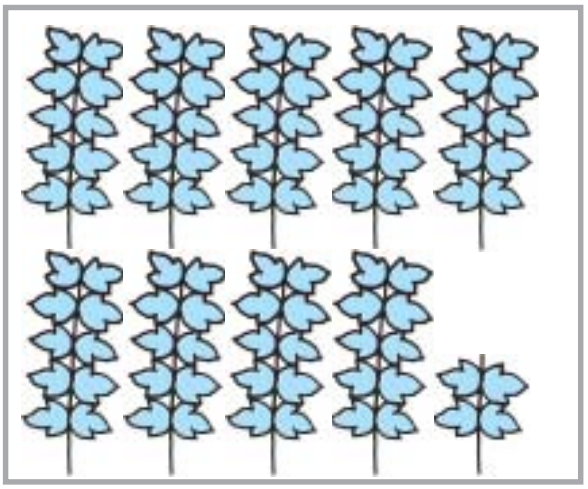
Counting 51 to 100

Count tens first.



87

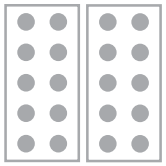




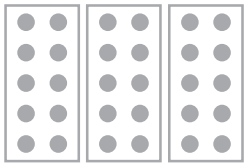
Tens

Count in tens.

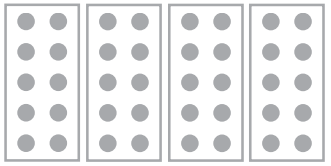
1 ten = 10



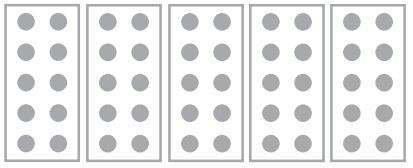
2 tens = 20



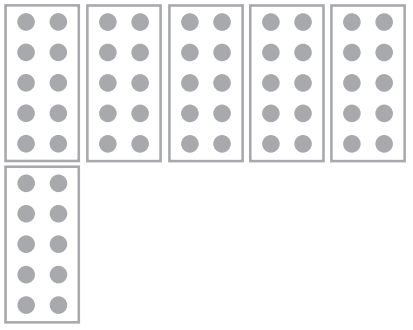
3 tens = 30



4 tens = 40

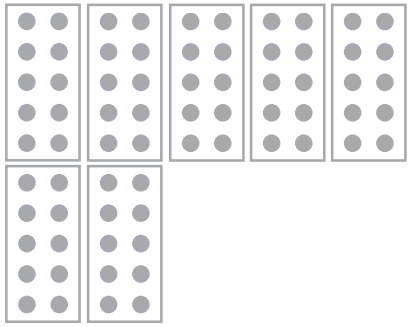


5 tens = 50

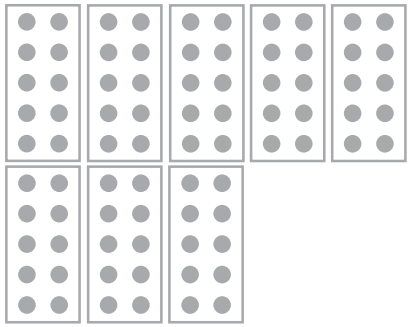


6 tens = 60

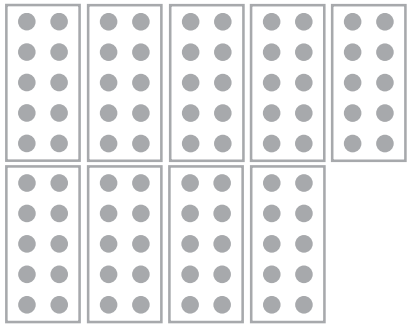
Tens



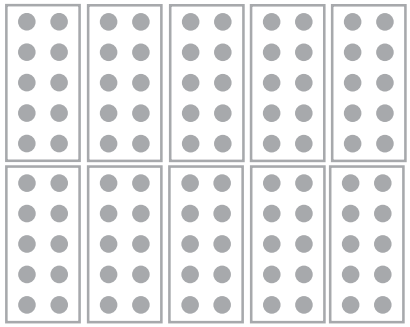
7 tens = 70



8 tens = 80

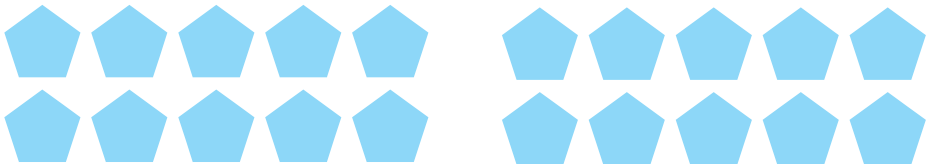


9 tens = 90

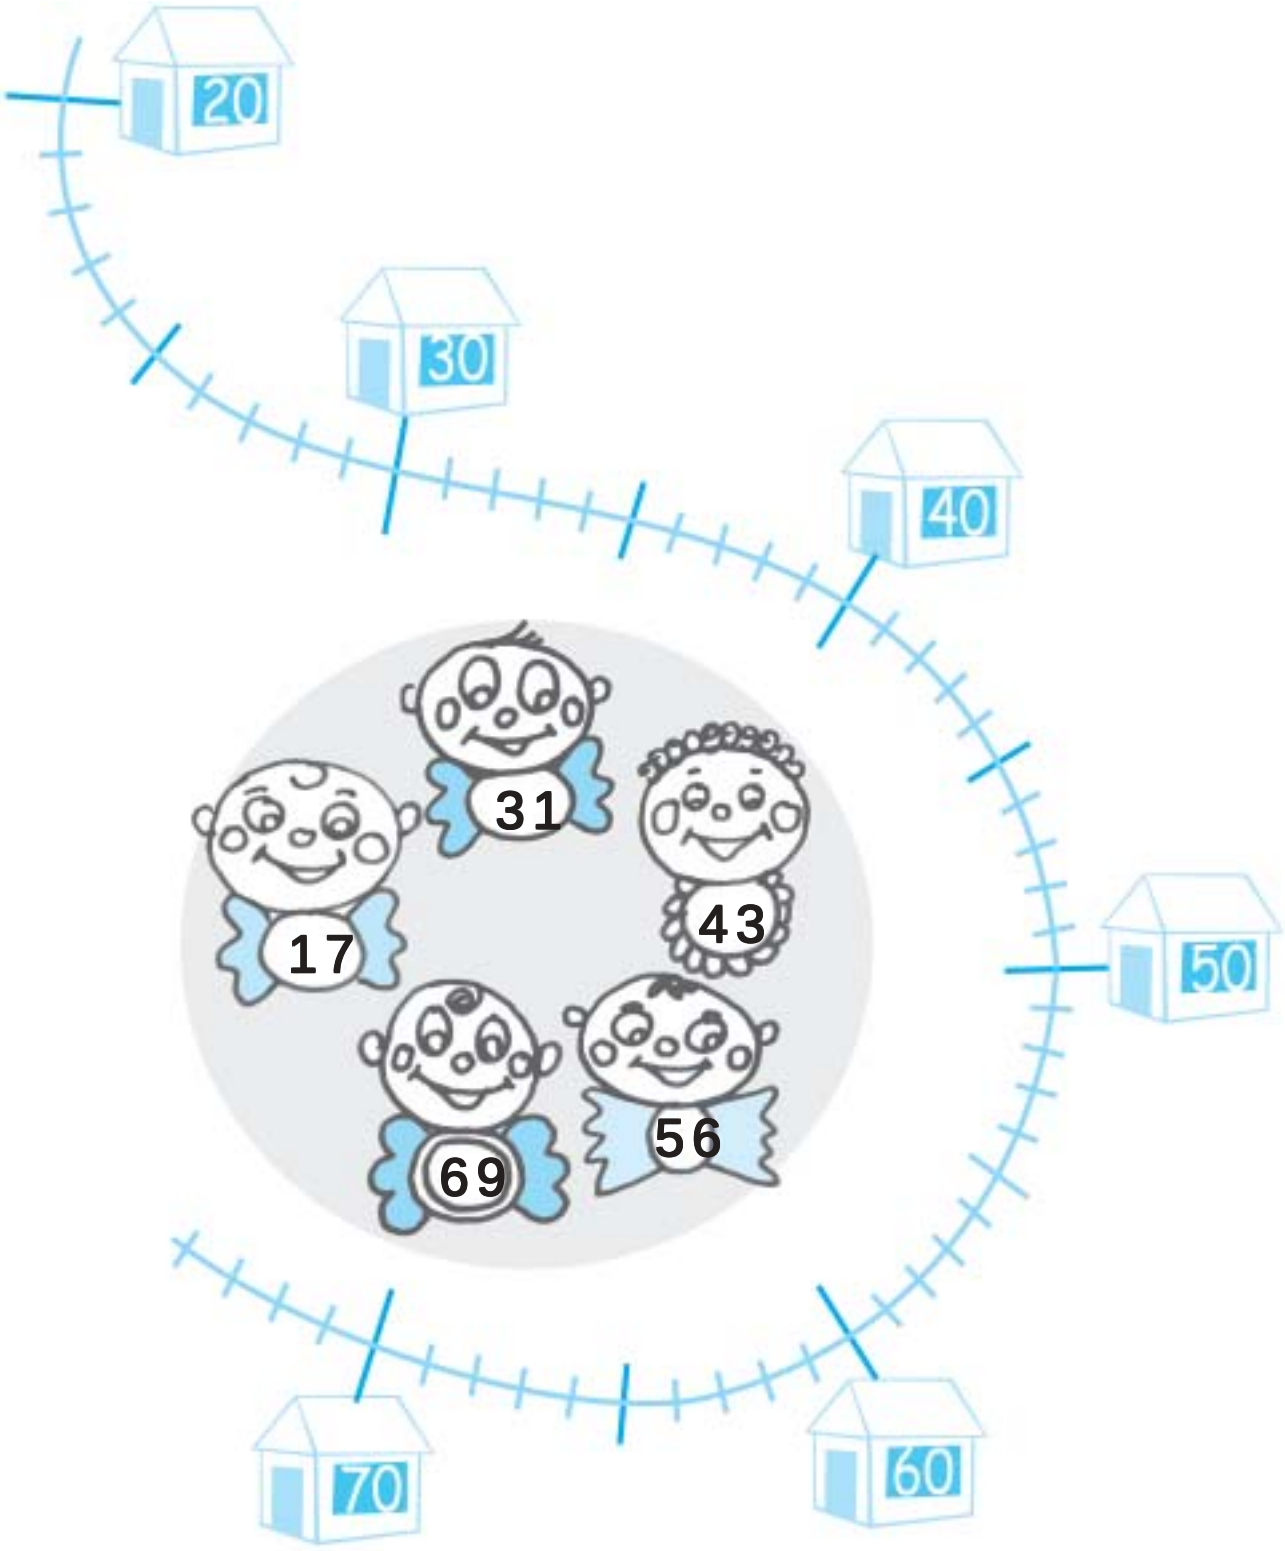


10 tens = 100

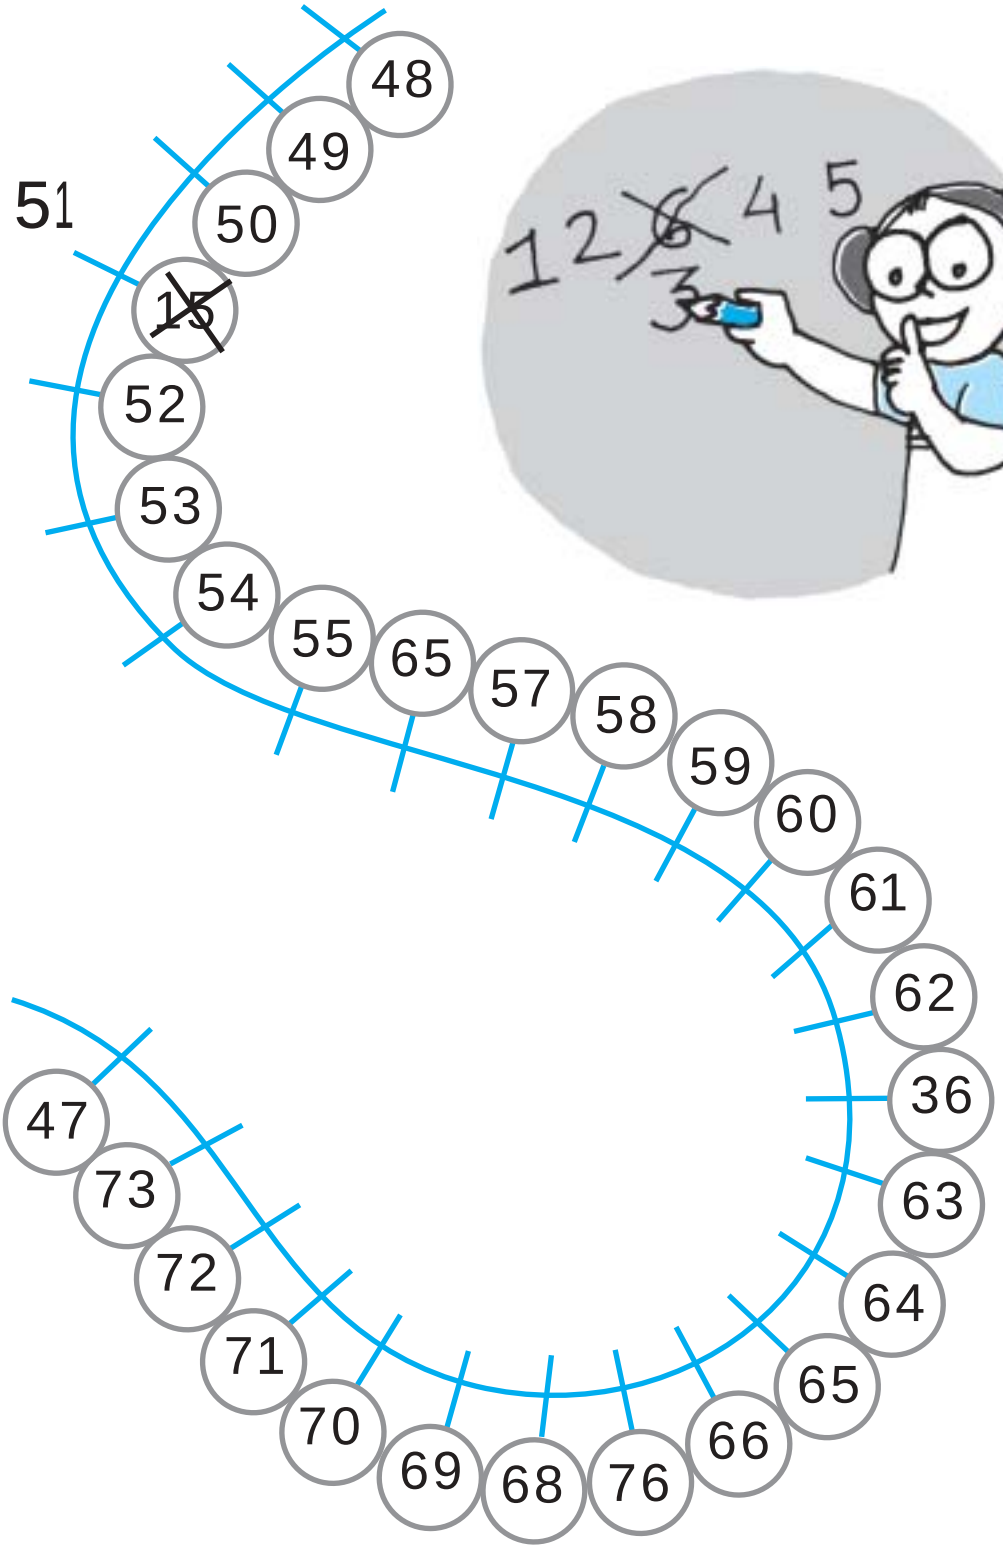
Counting in tens



Send a joker to his correct place

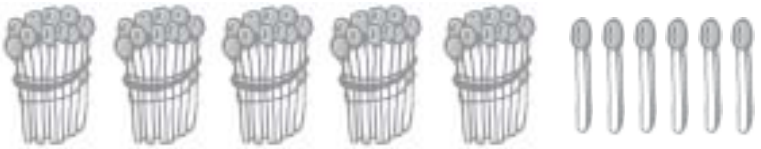


Find the wrong number and correct them.



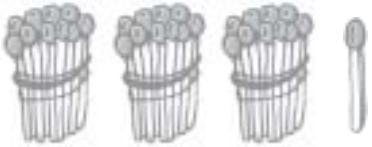
Fill in the missing number

Count and circle the correct number

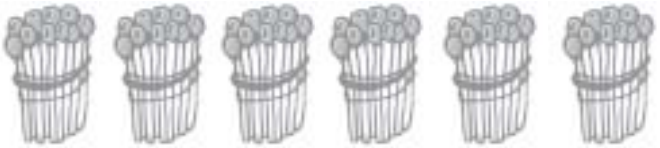


65 56

29 92



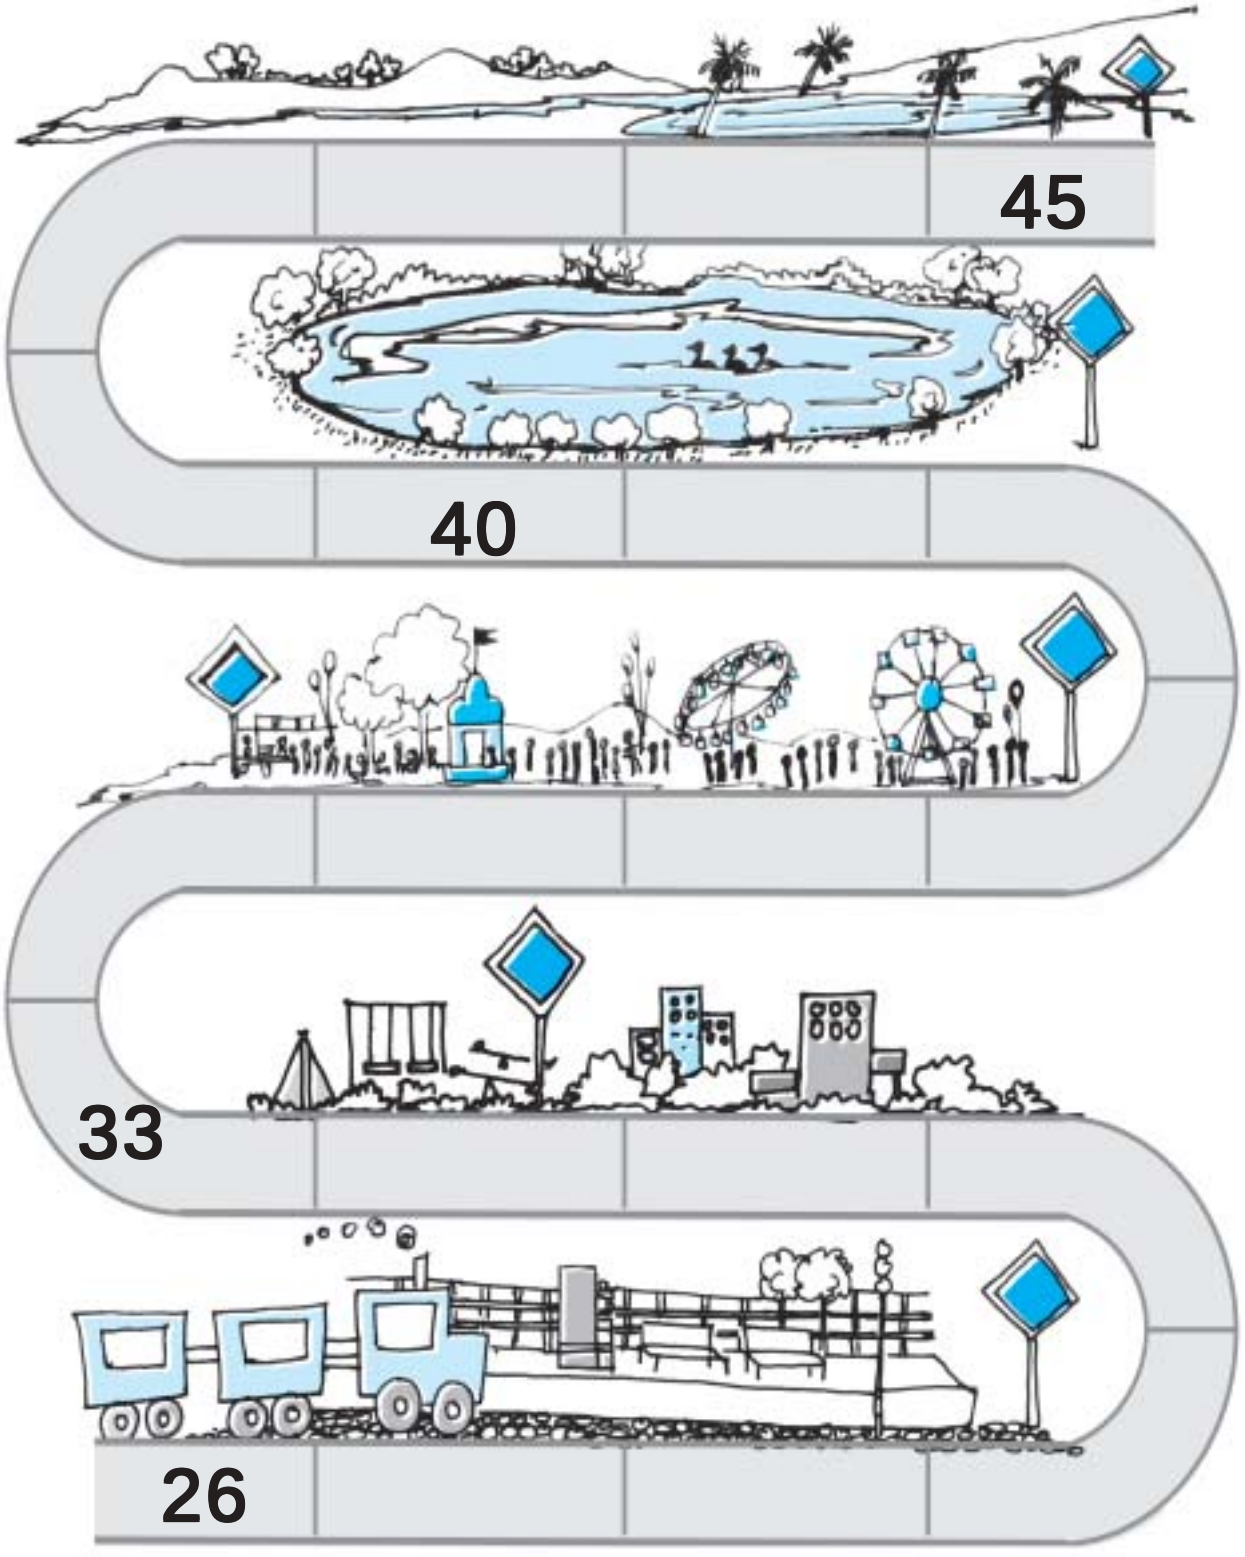
31 13



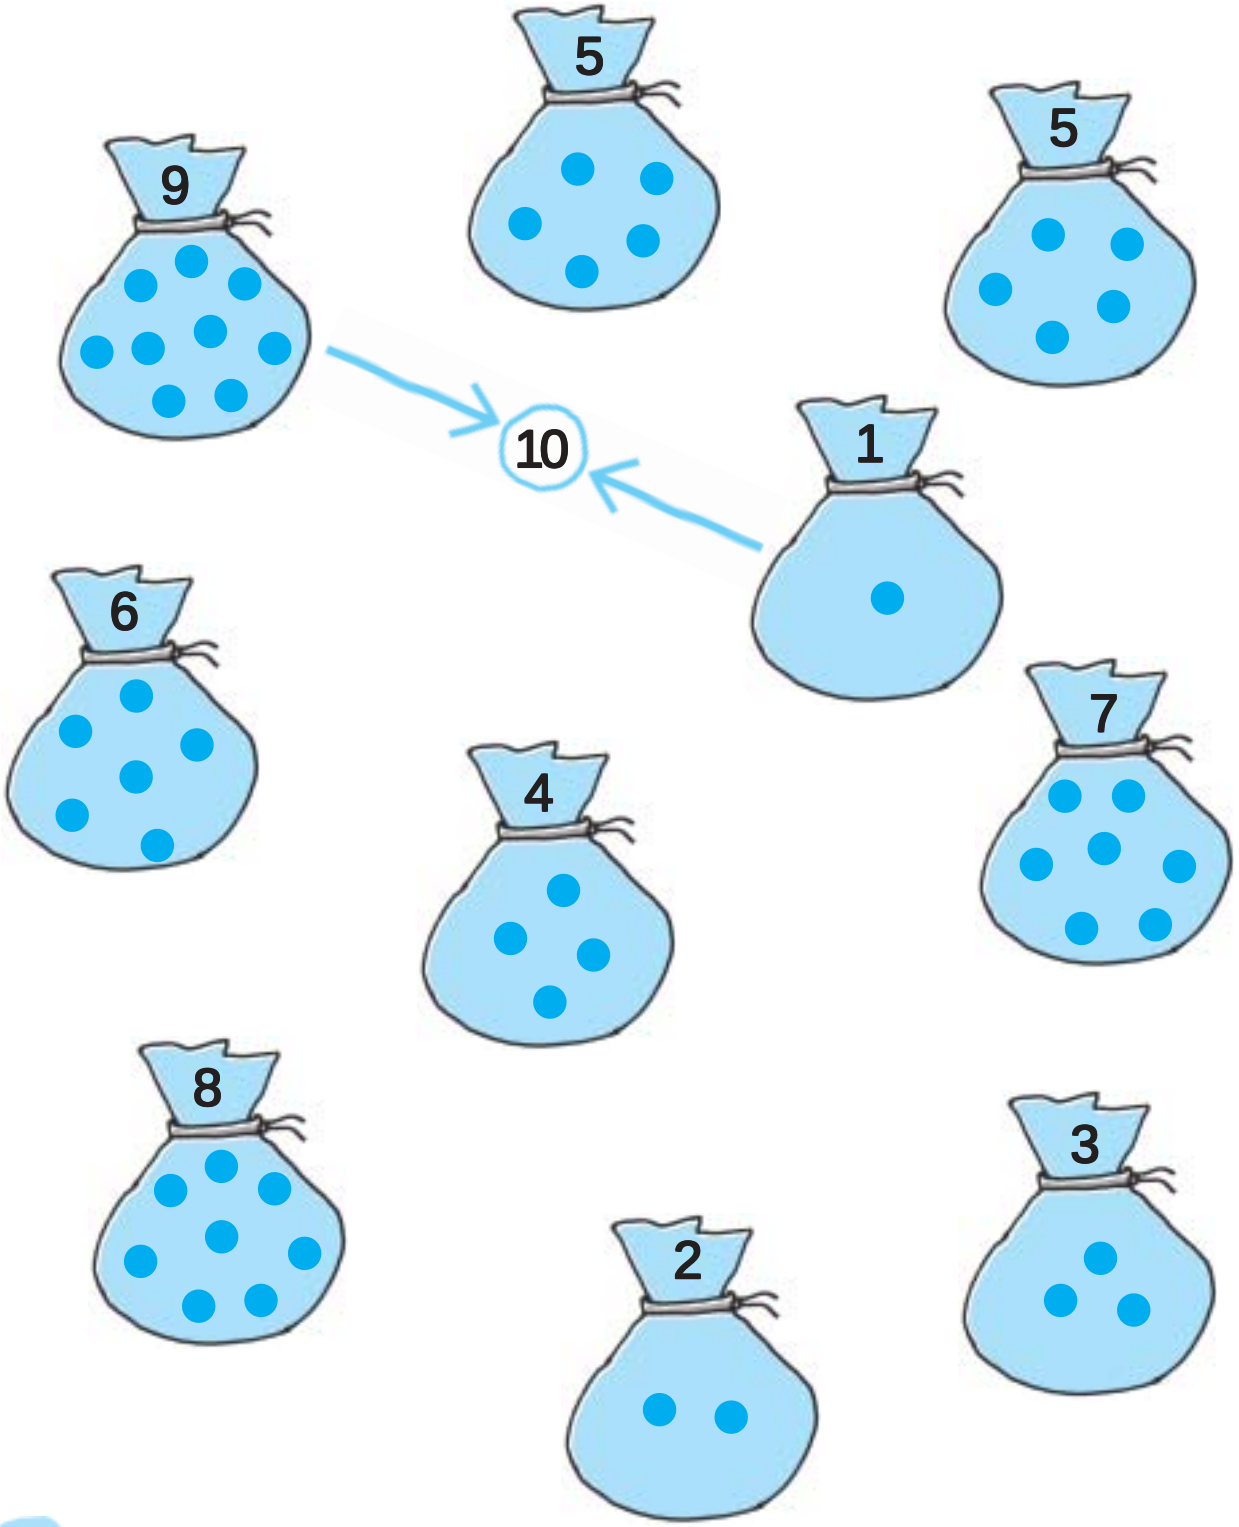
05 50

49 94

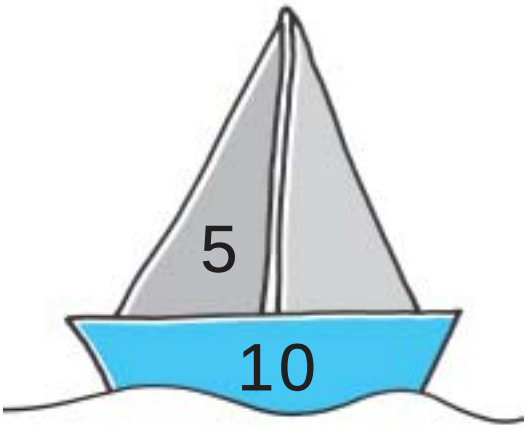
Number-tour

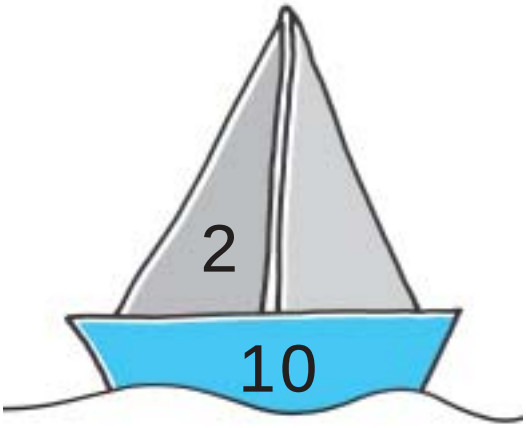


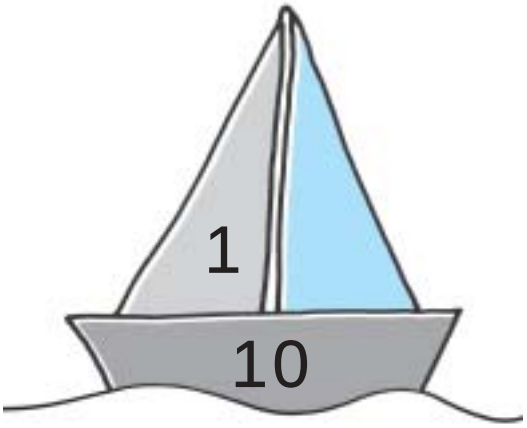
Join pairs which make ten

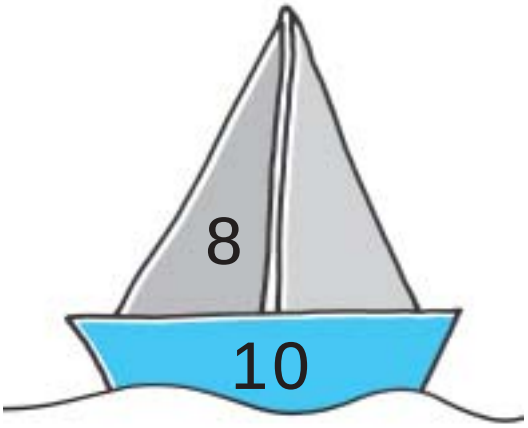


Write number on the ship to make ten

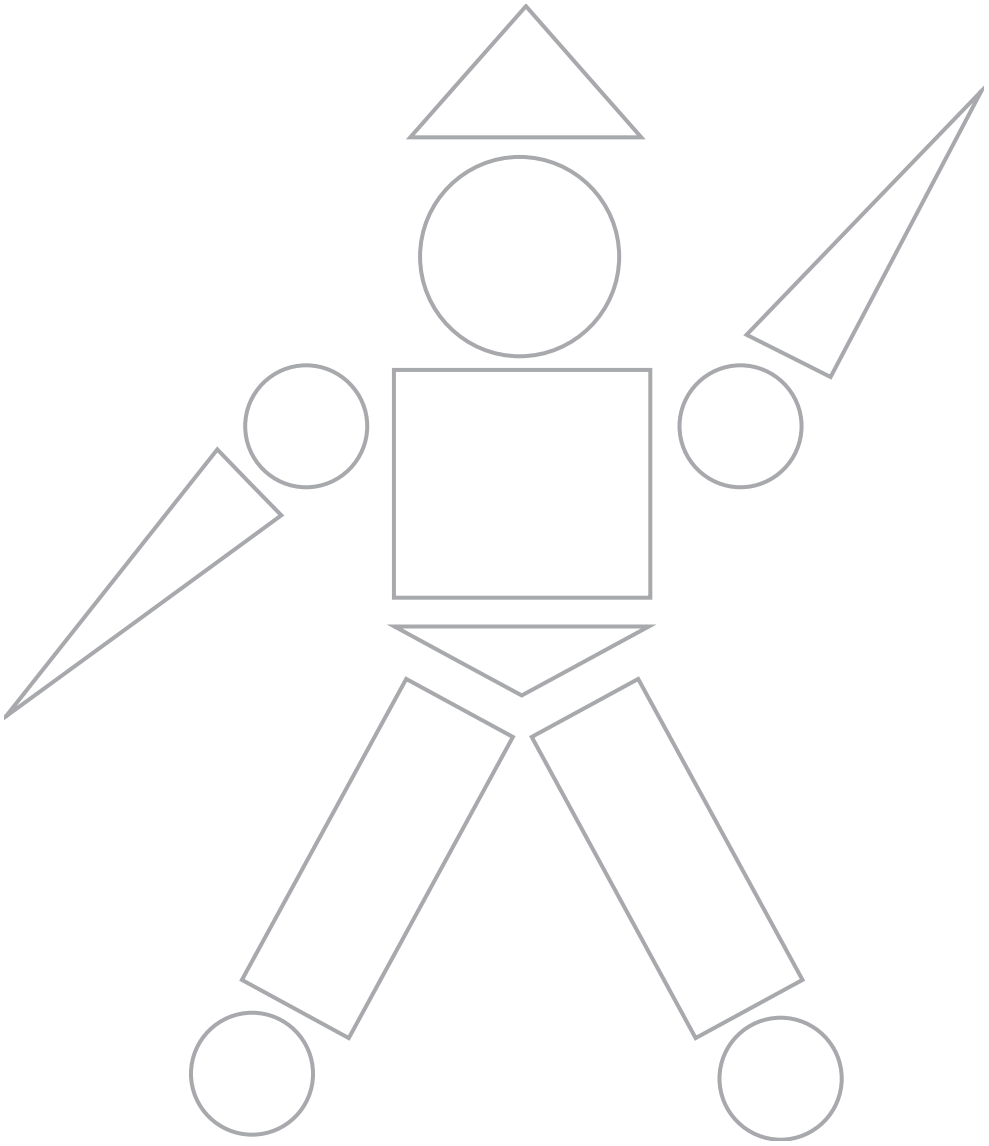








Join the shapes



How many quadrilaterals?

How many Triangles?

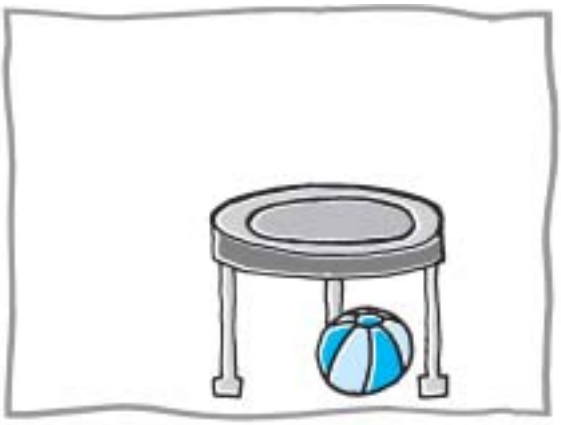
How many Circles?

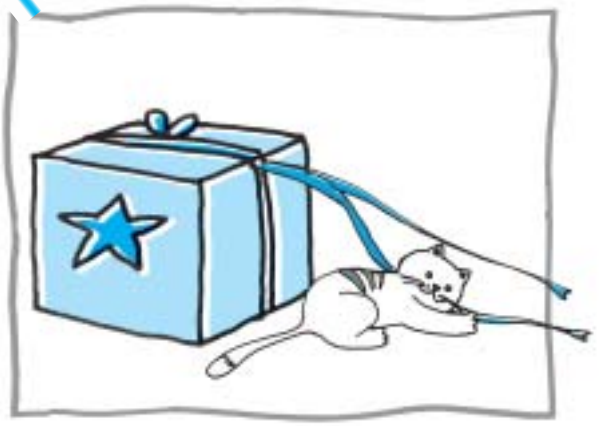
Count

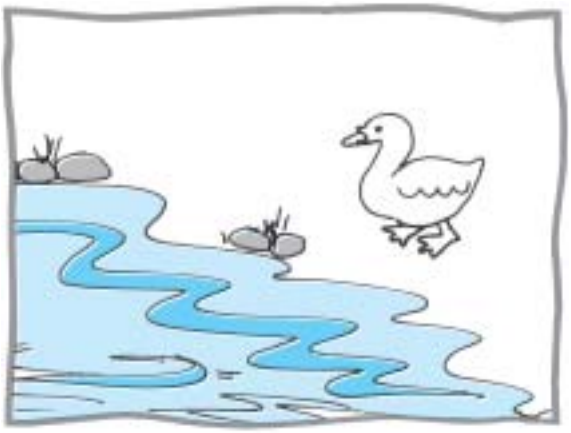
Add		Take away	
10 + 1 =		11 – 1 =	
10 + 2 =		12 – 1 =	
10 + 3 =		13 – 1 =	
10 + 4 =		14 – 1 =	
10 + 5 =		15 – 1 =	
10 + 6 =		16 – 1 =	
10 + 7 =		17 – 1 =	
10 + 8 =		18 – 1 =	
10 + 9 =		19 – 1 =	

What the pattern is!

Join opposites







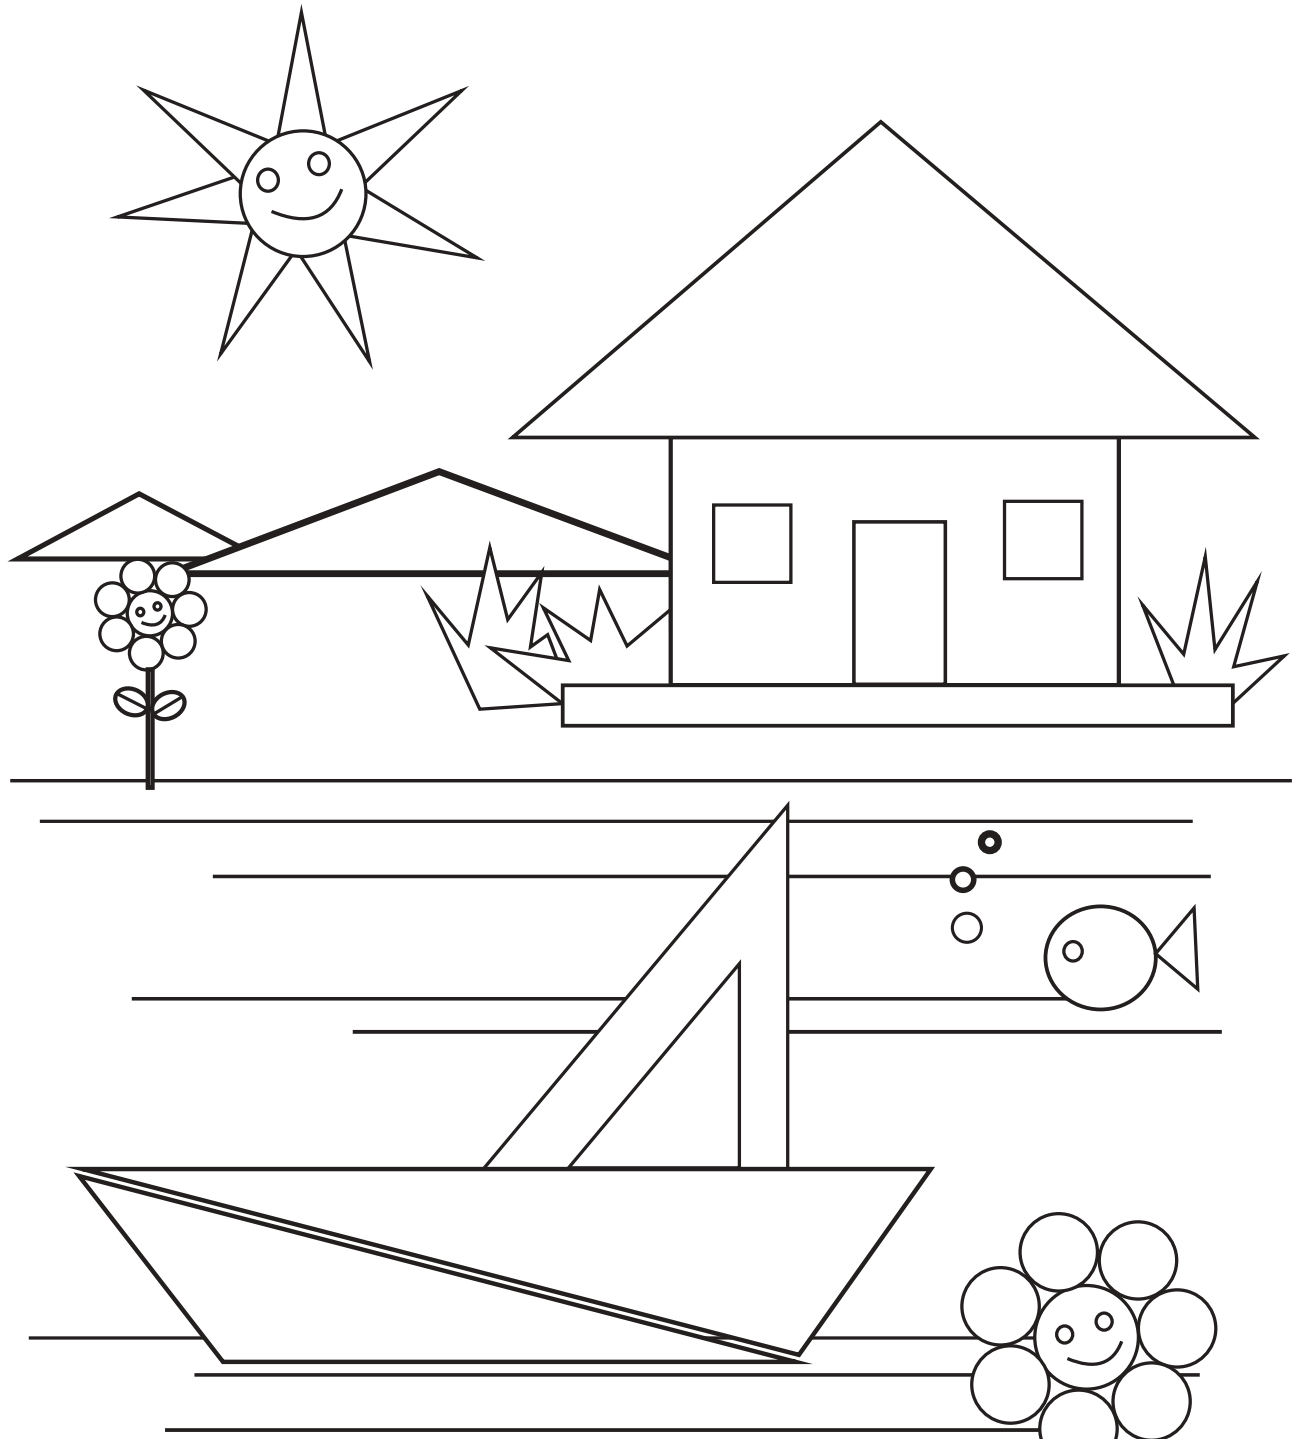
Add

5 + 7 =	10 + 5 =
6 + 6 =	12 + 7 =
4 + 9 =	15 + 4 =
5 + 3 =	13 + 6 =
8 + 7 =	11 + 7 =
9 + 2 =	18 + 0 =
3 + 8 =	16 + 2 =
5 + 5 =	14 + 3 =
6 + 8 =	10 + 8 =
4 + 7 =	15 + 4 =

Take away

9 – 4 =	19 – 4 =
8 – 3 =	17 – 3 =
7 – 5 =	18 – 5 =
9 – 6 =	16 – 4 =
6 – 2 =	14 – 2 =
12 – 3 =	15 – 4 =
19 – 3 =	18 – 5 =
18 – 2 =	13 – 0 =
15 – 5 =	12 – 1 =
18 – 7 =	19 – 9 =

Add

8 + 4 =	19 + 1 =
15 – 3 =	12 + 7 =
9 + 9 =	12 – 1 =
10 + 6 =	18 – 7 =
19 – 4 =	18 + 0 =
4 + 4 =	18 – 0 =
7 + 3 =	15 – 5 =
13 + 5 =	14 – 3 =
16 – 3 =	10 + 10 =
17 – 6 =	20 – 10 =


Colour the shapes
